

Shopping Create Item Specification

Version: 1.0

Product: Doma

Status: UX Freeze Draft

Position In User Flow

This screen is NOT the primary creation flow.

Primary flow:

Quick Add

↓

Item Created

↓

Optional Item Details

This screen exists for:

- advanced item creation
- editing existing items
- recurring purchases
- assigning responsibility

—

Purpose

Shopping Create Item — экран создания и редактирования товара для списка покупок.

Основная цель:

Добавлять товары максимально быстро, но при необходимости позволять детально настроить покупку.

UX Principles

Экран должен работать в двух сценариях:

Scenario 1: Quick Add

Пользователь хочет быстро добавить:

- молоко;
- хлеб;
- яйца.

Время создания:

менее 3 секунд.

Scenario 2: Detailed Item

Пользователь хочет указать:

- количество;
- категорию;
- срок покупки;
- ответственного;
- повторение;
- комментарий.

Время создания:

менее 15 секунд.

Navigation

Open From:

- Shopping Screen
- Shopping Mode
- Floating "+"
- Quick Add expansion

- updatedAt

UX Freeze Decision

Quick Add is the primary shopping creation flow.

Create Item Screen is considered an advanced flow.

The application should encourage Quick Add whenever possible.

—

Success Criteria

A user should be able to:

- create a basic item in under 3 seconds;
- create a detailed item in under 15 seconds;
- assign responsibility easily;
- schedule future purchases;
- configure recurring purchases;
- complete the process without confusion.

If these goals are achieved, Shopping Create Item UX is considered successful.
