

Shopping Mode Specification

Version: 1.0

Product: Doma

Status: UX Freeze Draft

Purpose

Shopping Mode — специальный полноэкранный режим для использования непосредственно во время похода в магазин.

Это не обычный список покупок.

Это рабочий режим выполнения покупки.

Основная цель:

Помочь быстро собрать все товары одной рукой без лишних действий.

Design Philosophy

Во время покупок пользователь:

- идёт по магазину;
- держит корзину;
- держит ребёнка;
- толкает тележку.

Поэтому интерфейс должен быть максимально простым.

Основной принцип:

One Tap Shopping

Любой товар должен отмечаться одним касанием.

Entry Points

Shopping Mode открывается:

From Shopping Screen

Button:

Start Shopping

From Notification

Example:

Shopping trip planned for today

From Widget

Future enhancement.

Screen Structure

Shopping Mode состоит из:

Header

Progress Card

Active Shopping List

Completed Items

Finish Shopping

Header

Contains:

Back Button

Title

More Menu

Example

← Shopping Mode

Header Rules

Navigation tabs hidden.

Bottom navigation hidden.

User is fully focused on shopping.

VoiceOver support

High contrast mode

Dynamic text scaling

One-handed use

Future Enhancements

Not Included In MVP

Price tracking

Receipt scanning

Barcode scanning

Store route optimization

AI replenishment

Voice shopping mode

Apple Watch companion

Success Criteria

A user should be able to:

Complete an item with one tap.

Use the app with one hand.

Finish shopping without opening item details.

Understand progress instantly.

Share shopping with family members.

Avoid duplicate purchases.

Complete an average shopping trip faster than using a paper list.

If these goals are achieved, Shopping Mode UX is considered successful.
