

Shopping Templates Specification

Version: 1.0

Product: Doma

Status: UX Freeze Draft

Purpose

Shopping Templates allow users to quickly create predefined shopping lists.

Instead of adding items one by one, users can apply a template and instantly populate the shopping list.

Purpose:

Reduce repetitive work.

Design Philosophy

Families repeatedly buy the same sets of items.

Examples:

- weekly groceries;
- baby supplies;
- pharmacy essentials;
- travel preparation.

Templates should allow users to recreate these lists with one tap.

Position In Shopping Module

Shopping Templates are a secondary feature.

Primary Flow:

Quick Add

↓

Item Created

Secondary Flow:

Template

- createdAt
- updatedAt

Success Criteria

A user should be able to:

Create a template in under 1 minute.

Apply a template in one tap.

Avoid duplicate items.

Share templates with family.

Reuse recurring shopping lists efficiently.

If these goals are achieved, Shopping Templates UX is considered successful.
